QUYẾT ĐỊNH

Ban hành Kế hoạch giám sát trọng điểm COVID-19

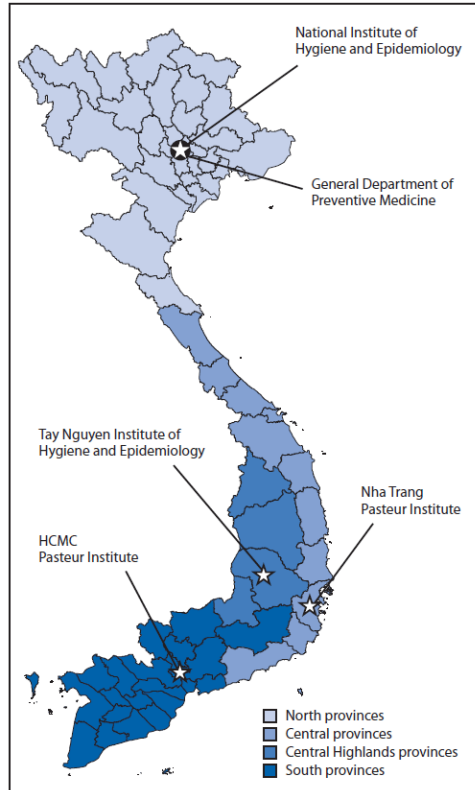

Stronger laboratories, better case detection

- Guidelines:
 - Provided TA for development of guidelines on sample collection, biosafety and national testing strategy.
 - Updated/shared the latest information related to testing via meeting, email and online discussion
- Training: Developed training materials and trained 516 healthcare workers from >110 health facilities on sample collection, real-time RT PCR for SARS-CoV-2, and biosafety/bio-risk assessment
- Provided real-time RT PCR reagents and consumables for 70,000 tests
- Supported External Quality Assessment (EQA) program for SARS-CoV-2 – real-time RT PCR to 50 public health and clinical labs

Emergency Operations Centers: Real spaces for real collaboration and information sharing

Field investigations: Go where the outbreak is happening

IPC: Protecting patients and those who care for them

Activity	Partner	Outcome
Guideline development	VAMS	IPC guideline for COVID-19 in healthcare settings
		IPC guideline on ventilation, HCW management
		Video training on CPR for HCW
	VAMS/PATH	Checklist, dashboard for IPC response to COVID-19
	APHL/HICS	IPC training materials for e-learning
E-learning program on COVID-IPC		
Support training		

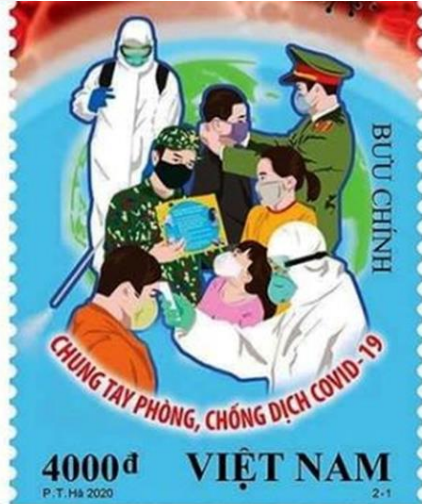

IPC: Protecting patients and those who care for them

Activity	Partner	Outcome
Provide mentoring	VAMS	Online TA to 21 selected hospitals of 10 priority provinces and more with VAMS's priority.
		Ventilation at 6 hospitals (Bach Mai, 2 Quang Ninh, Cu Chi, Tay Ninh, Da Nang) plan for 4 more.
Procurement	APHL	Provide Equipment for selected hospital to conduct online consultation meeting and virtual training
